SUMMARY OF ELECTRICITY GENERATION VOLUME OF POWER PLANTS FOR THE FIRST QUARTER OF 2022

This announcement is made by Beijing Energy International Holding Co., Ltd. (the “**Company**”, collectively with its subsidiaries, the “**Group**”) to keep the shareholders and potential investors of the Company informed of the latest business development of the Group. The board of directors of the Company announces that according to the Group’s preliminary operation statistics, the 102 power plants beneficially owned by the Group have generated electricity in an aggregate volume of approximately 1,182,265 megawatt-hours (“**MWh**”) in the first quarter (“**Q1**”) of 2022.

Details of the electricity generation statistics in Q1 of 2022 are summarised as below:

Settlement Type	Location	As at 31 March 2022			Approximate Electricity Generation Volume for		
		Number of Solar Power Plants ⁽²⁾	Number of Wind Power Plants ⁽²⁾	Approximate Grid-connected Installed Capacity (MW)	Q1 2021 (MWh)	Q1 2022 (MWh)	Three Months Ended 31 March 2022 (MWh)

Notes:

- (1) In order to adapt to the business development needs of the Group, the classification of power plants has been adjusted according to different types of settlement. The total capacity on-grid mode refers to the settlement of all electricity generated by a power plant with the grid; while the surplus capacity on-grid mode means that a portion of the electricity generated by a power plant is sold directly to the end-user and the surplus electricity is settled with the grid.
- (2) In order to meet the actual operational management needs, the Group has made necessary aggregation and adjustment to the number of power plants under its management, which does not affect the installed capacity of the power plants under its management.
- (3) The operation figures previously announced have been adjusted to be in line with the available accounting figures and to reflect the change(s) in our portfolio of power plants with effect from each transaction's respective completion date.

- (4) The Group completed the disposal of the entire equity interests in a project company at the end of 2021, and a solar power plant with installed capacity of approximately 10MW had achieved grid-connection in Q1.
- (5) The figures provided herein are subject to rounding adjustment and will be subject to other possible adjustments due to accounting procedures.

Shareholders and/or potential investors of the Company are hereby reminded that the information provided above merely represents the preliminary operating performance of the renewable energy power plants beneficially owned by the Group as of 31 March 2022 based on data currently available to the management, and is by no means a representation or a basis of reference or indication of the revenue or profit to be generated or derived by the Group or any financial performance of the Group in Q1 of 2022 or for the three months ended 31 March 2022. Accordingly, shareholders and/or potential investors of the Company are advised to exercise caution when dealing in the securities of the Company.

For and on behalf of
Beijing Energy International Holding Co., Ltd.
