### **Basis for Determination of the Contract Price under the EPC Contract**

The contract price under the EPC Contract was determined by the parties after arm’s length negotiation and through a tendering selection process. In particular, the Company has considered the following factors during the selection of the contractors and the determination of the relevant contract price: (i) the design and construction proposal submitted; (ii) the track record of the candidates of contractors on performing similar projects; (iii) the size of operation, manpower and financial performance of the candidates of contractors; (iv) the expected power capacity (measured in MW) of the EPC Project; and (v) the prevailing market price of the provision of similar EPC services.

### **Reasons for and Benefits of Entering into the EPC Contract**

Having considered the development and the expected return from the investment in wind power generation in the renewable energy industry in the PRC, the Company is optimistic about the prospect of such industry in the foreseeable future. Other borrowings

Save as aforesaid and apart from intra-group liabilities, the Group did not have any debt securities issued and outstanding, and authorised or otherwise created but unissued, or any material outstanding loan capital, bank overdrafts, loans, mortgages, charges or other similar indebtedness, liabilities under acceptances (other than normal trade bills) or acceptance credits, hire purchase commitments, guarantees or any other actual or material contingent liabilities outstanding at the close of business on 31 May 2024, being the latest practicable date for the purpose of this indebtedness statement prior to the printing of this circular.

The Directors confirm that there has been no material change to the indebtedness and contingent liabilities of the Group since 31 May 2024 up to and including the Latest Practicable Date.

**3. SUFFICIENCY OF WORKING CAPITAL**

Taking into account the financial resources of the Group (including the Group's internal resources, available banking and other borrowing facilities and credit enhancement guarantee from BEH, a controlling Shareholder holding approximately 32.14% of the issued share capital of the Company), in the absence of any unforeseen circumstances, the Directors are of the opinion that the Group will have sufficient working capital for the Group's requirements for at least the next 12 months from the date of this circular. The Company has obtained the relevant confirmation as required under Rule 14.66(12) of the Listing Rules.

**4. MATERIAL CHANGES**

The Directors confirmed that, as at the Latest Practicable Date, there had not been any material change in the financial or operation position or outlook of the Group since 31 December 2023, being the date to which the latest published audited consolidated financial statements of the Group were made up, up to and including the Latest Practicable Date.

**5. IMPACT ON THE EARNINGS, ASSETS AND LIABILITIES OF THE GROUP**

As at 31 December 2023, the audited consolidated total assets and total liabilities of the Group amounted to approximately RMB90,036 million and RMB72,973 million respectively. The consideration payable under the EPC Contract will be settled in cash by way of utilising the Group's internal resources and external financing.

The facilities under the EPC Contract would be recorded as property, plant and equipment under non-current assets of the Group and hence the amount of the total assets of the Group is expected to increase following the completion of the works, after such increase is partially offset by the decrease in cash and cash equivalents. The amount of the total liabilities of the Group is also expected to increase due to the funding requirements of the consideration of the EPC Contract. Given the nature of the EPC Contract, the Group does not expect the EPC Contract to have immediate material impact on the earnings of the Group.

**6. FINANCIAL AND OPERATIONAL PROSPECTS OF THE GROUP**

The Group is primarily engaged in the development, investment, operation and management of power plants and other clean energy projects.

According to the Group's preliminary operation statistics, the 206 power plants beneficially owned by the Group and its associates with an aggregate installed capacity of approximately 9,515 MW have generated electricity in an aggregate volume of approximately 3,714,728 MWh in the first quarter of 2024.

Looking forward, with the strong support of BEH, the Group will further focus on its main business. It will fully leverage the opportunity of the transition of energy structure to a clean and low-carbon model and its rapid development and determine the main line of business development. Meanwhile, the Group will coordinate domestic and overseas market resources to optimise assets allocation, and realise scale expansion and intensive development of solar power and wind power and other new energy businesses. In addition to the rapid development of existing new energy businesses, the Group will keep up with the industry's high-tech and new technology development trends, and actively promote the combination of energy and data by capturing new opportunities arising from the clean energy industry ecosystem. Furthermore, it will mainly focus on integrated energy business with the focus placed on big data, and integrate various types of resources including distributed energy, energy storage and hydrogen energy and user loads. It will research and promote the multi-energy complementary integrated services and terminal energy solutions based on renewable energy. By realising the business optimisation transformation and sustainable healthy development of the Group through value creation, it will be in the best interests of the Group and its Shareholders.
