Reference is made to the announcements of Goldpoly New Energy Holdings Limited (the “**Company**”) dated 18 January 2013 and 31 March 2013 in respect of, among other things, a very substantial acquisition and connected transaction regarding the acquisition of approximately 92.17% of the issued share capital of China Merchants New Energy Holdings Limited and certain proposed continuing connected transactions regarding, among others, provision of solar electricity and energy saving service by members of the Enlarged Group to members of CMNEG Group, and the announcements of the Company dated 15 March 2013 and 30 April 2013 in respect of the delay in despatch of the Circular (collectively, the “**Announcements**”). Capitalised terms used herein shall have the same meanings as those defined in the Announcements unless otherwise specified.

COMPLIANCE WITH THE LISTING RULES

As disclosed in the Announcements, the income approach has been adopted for the valuation of the Concession Rights which constitutes a profit forecast under the Listing Rules. Accordingly, Rule 14.62 of the Listing Rules applies.

The valuation report for the Concession Rights (the “**Valuation Report**”) was prepared by the Independent Valuer based on the following assumptions:

- (1) there will be no major changes in the laws, rules or regulations, financial, economic, market and political conditions where the Target Group and the projects in connection with the Concession Rights operate or intend to operate which may materially and adversely affect its business;
- (2) solar power will not be substantially replaced or made obsolete by other sources of energy;
- (3) there will be no major fluctuations in the solar illumination conditions across the regions that the Target Group’s solar power plants operate;
- (4) given the current stage of development of the proposed projects, government supports under the 12th Five-Year Plan on Solar Power Development as set out in the Industry Overview section of the Circular, the competitive edge of the Target Group, continuous support of the management and the existing shareholders of the Target Company, including GCL-Poly, Zhongli Talesun and CMNEG, it is reasonably assumed that business plans of the solar power plant projects in relation to the Concession Rights will be proceeded and completed as contemplated and revenue growth of those projects driven by electricity generating capacity will be in line with the relevant projects roll-out schedules;
- (5) both rooftop and ground-based solar power plants of the Target Group will obtain the respective local grid company’s consents to connect to the power grids and the relevant grid companies will purchase and transmit all electricity generated by the solar power plants operated by the Target Group;

- (6) the legally binding framework agreements signed by the Target Group in relation to the solar power plant projects will be realised into official or definitive acquisition agreements. As a result, the risk and reward associated with such solar power plant projects will eventually be transferred to the Target Group;
- (7) all rooftop solar power plant projects (except certain 2013 projects which has obtained special tariff approved by local government) could successfully obtain the subsidy from the Golden Sun Program;
- (8) electricity price in the PRC has been repeatedly adjusted upward since 2008. Thus, it is assumed that the Target Group is able to adjust electricity tariff for certain rooftop solar power plant projects, whose end customers are individuals, and it was assumed to grow at a rate similar to the long-term inflation rate. For ground-based solar power plant projects, since end-customer is State Grid, electricity tariff are subsidised and the Target Group has no discretion to adjust tariff and hence, tariff for ground-based projects is assumed to remain stable;
- (9) regulatory environment and market conditions for solar energy industry will be developing according to prevailing market expectations, including continual support from the PRC government in terms of timing and amount of capital expenditure and on-grid tariff subsidies;
- (10) there will be no major changes in the current taxation law in the PRC;
- (11) the Target Group will fulfil all legal and regulatory requirements (e.g. obtaining necessary licences) for the solar power plant business, including those related to the Concession Rights;
- (12) the projects in connection with the Concession Rights will not be constrained by the availability of finance and there will be no material fluctuation of the finance costs;
- (13) there will not be any adverse events beyond the control of the Target Group's management, including natural disasters, catastrophes, fire, explosion, flooding, acts of terrorism and epidemics that may adversely affect the operation of the projects in connection with the Concession Rights;
- (14) the future movement of exchange rates and interest rates will not differ materially from prevailing market expectations; and
- (15) the Target Group will retain competent management, key personnel and technical staff for its operations and the relevant shareholders will support its ongoing operations.

The Company engaged the reporting accountant of the Company, PricewaterhouseCoopers, to report on the calculations of the discounted future estimated cash flows on which the Valuation Report dated 10 May 2013 prepared by Independent Valuer in respect of the fair value of the Concession Rights is based, in accordance with the Hong Kong Standard on Assurance Engagements 3000 “Assurance Engagements Other Than Audits or Reviews of Historical Financial Information”. Such report has been included in the Circular.
